PREETHI CM

preethiacharya2005@gmail.com | 8310780083 | Hassan,Karnataka | github.com/Preethi-CM | linkdin.com/in/preethi-c-m

CAREER OBJECTIVE

Dedicated and results-driven Software Engineer seeking a Full-Time position to leverage technical expertise in web development, combined with strong problem-solving abilities, to contribute to innovative projects and drive organizational growth while continuously advancing professional skills.

EDUCATION

B.E.ComputerScience& Engineering
Rajeev Institute of Technology, Hassan | Expected Graduation: June 2026

CGPA: 8.5/10

CORE TECHNICAL SKILLS

Programming Languages: C, Python, JavaScript, HTML, CSS

Frontend Development: React, Next.js, Responsive Design

Backend &APIs: REST APIs

Databases: Supabase (PostgreSQL)

Tools & Platforms: VS Code, Android Studio, Google AI Studio, Git, GitHub

Development Practices: Full-Stack Development, API Integration, Database Design, Code Optimization

PROFESSIONAL EXPERIENCE

Android App Developer Intern
MindMatrix | September 2024 – Present | Remote

- Developed and deployed 3 production-ready applications serving 100+ active users with optimized performance and seamless user experience
- Optimized application performance by 35% through efficient database query optimization and UI rendering techniques
- Integrated REST APIs and real-time data synchronization features for enhanced application functionality
- Implemented offline-first architecture ensuring consistent user experience without internet connectivity
- Collaborated with cross-functional teams to translate design specifications into functional applications

Full-Stack Developer Intern
IIPS | August2025–Present | Remote

- Designed and developed responsive web dashboards using React and Next.js processing data for 500+ concurrent users
- Optimized database performance by 40% through strategic indexing and query restructuring on PostgreSQL
- Built and maintained RESTful APIs using Node.js handling 1000+ requests per day with robust error handling
- Created interactive data visualization components for real-time analytics and reporting dashboards
- Implemented secure authentication and authorization mechanisms using industry-standard protocols

Web Developer Intern
InternPe | April – May 2025 | Remote

- Developed responsive web applications using React with modern UI/UX design principles
- Built reusable and modular React components, reducing code duplication by 30%
- Implemented advanced data filtering, search functionality for large datasets (500+ records)
- Optimized frontend performance through CSS and JavaScript optimization for faster page load times
- Collaborated with backend development team to ensure seamless API integration and data consistency

PROJECTS & TECHNICAL CONTRIBUTIONS

Multi-User Performance Management System

- **Problem Statement:** Comprehensive employee performance tracking solution to monitor task progress, attendance, and performancemetricsacrossmultiple userroles
- **Role & Contributions:** AndroidApp Development, database schema design, UI implementation, performance optimization
- **Technologies Used:** Android Studio, Roomdatabase, Firebase (PostgreSQL), kotlin, Google AI Studio integration
- **Outcomes & Learning:** Successfully deployed system serving 100+ users with 35% performance improvement through queryoptimization; gained expertise inmulti-role user management, real-time analytics, and production deployment practices

Job Portal & Career Management Platform

- **Problem Statement:** Centralizedplatformfor job listings, application tracking, and candidate-employer interaction
- **Role & Contributions:** BackendAPIdevelopment, frontend UI design, database schema optimization, authentication implementation
- **Technologies Used:** React,Node.js,RESTAPIs, Supabase, JavaScript, HTML, CSS, JWT Authentication
- **Outcomes & Learning:** Builtscalablejobmatching system with secure user authentication; learned RESTful API design principlesandrelational databaseoptimization with real-world application deployment experience

Intelligent Chatbot with AI Integration

- **Problem Statement:** Interactivechatbot application with contextual understanding and conversation management
- **Role & Contributions:** Frontenddevelopment, API integration, user interface design, real-time response handling
- **Technologies Used:** RESTAPIs,Google AI Studio (Gemini API), JavaScript, HTML, CSS, LLM
- **Outcomes & Learning:** Integrated cutting-edge LLM technology with context-aware response system; gained expertise in AI/MLAPIintegration, conversation state management, and asynchronous programming

CERTIFICATIONS & ACHIEVEMENTS

AgentBlazer Champion (2024) – Innovation award for developing cutting-edge applications with exceptional technical excellence

Oracle DataScience Professional

PrepInsta Data Science Professional –AdvancedPythonprogramming, data analysis, and statistical methods

Oracle Cloud Infrastructure – AI Foundation Certification – Cloud infrastructure and AI fundamentals

Oracle GenAI Professional –AdvancedgenerativeAIconcepts and applications

SOFT SKILLS

Communication: Clear articulation of technical concepts and effective team collaboration

Problem Solving: Systematic approach to debugging, optimizing code, and resolving complex technical challenges

Critical Thinking: Analytical mindset for evaluating solutions and making data-driven decisions

Team Collaboration: Excellent ability to work effectively with cross-functional teams and stakeholders

Adaptability: Quicklearner with ability to master new technologies and frameworks efficiently

LANGUAGES

English | Kannada
